Re: Acquiring waste code numbers for the Grant Rd. "Superfund"
funded site in Spring, TX

Dear Ms. McGee;

Enclosed is a request for waste code numbers for waste streams generated at the EPA time critical removal site in Spring, Texas. Since this is a "Superfund" funded removal site, the generator of the waste will be the U.S. Environmental Protection Agency (EPA I.D. # TXD982305195). There are 3 waste streams that will be leaving this site headed towards disposal:

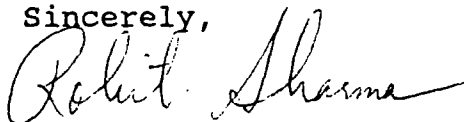

WS #1 - Flammable liquids & sludges (D001, F003, F005). Profile # J21178

WS #2 - Wastewater containing solvents & Soil (F003, F005). Profile #J21179

WS #3 - Paint sludge & dirt (F003, F005, D008). Profile #J21180

Since this project is a time critical removal action, a prompt reply from your agency is requested. Included with the Waste Code Form are the profile sheets for the appropriate waste streams. If you require any further information or have any questions please call me at 713-479-5295.

Sincerely,

Roe Sharma
